REMEDIAL MEASURES- IMPORTANT TO READ

Each jyotisha student during the jyotish training goes through the various stages of learning. In the beginning phases, one has to study siddhanta, various calculations, astronomical positions and facts, and traditional teachings. During the process where Guru or the Teacher leads the students through various tools of Vedic Astrology such as philosophy, principles of judgments as well as various advice methods and traditional methods as how to prevent negative influences and promote positive influences in life. During the previous 15 years of studies with my Guru Pt. Sanjay Rath who belongs to the Parampara or lineage of traditional jyotishas from Puri, Orissa, I have been traditionally trained in the knowledge of Mantra Shastra and various spiritual vedic and jyotish texts, as how to improve your destiny trends, try to prevent negative influences in all walks of life, or change what we can change in our destinies.

Please never forget the facts that certain segments of destiny cannot be changed, and belong to what we call „dridha“ or sthira –fixed karma, however, the mere fact and awareness of these brings considerable relief. Other matters which are subject to change can be considerably improved or changed with the help of remedial measures. Some remedial measures have to be conducted through the life or a certain period (dasha), like in certain chronic disease where we are bound to consume medicines for a life time. Other remedial measures can give results at once or very quickly depending on the type of destiny we carry. Ancient Jyotisha texts advice three methods as how to change or improve your destiny. These are:

1. **MANTRA-** comes from the word Manas (mind) and trai (protection). These are the sounds which were written down by ancient seers in various old texts, or were transmitted orally within traditions. Mantras are very similar to prayers, while each sound carries a certain vibration which can create a particular impact. Knowledge of the mantra shastra is based on the knowledge of all aksaras (sounds), and their impacts on human soul, mind and body. Each language is based on sounds, and therefore the mantra shastra underlines or is common (universal) knowledge for all people. Everybody who can utter a sound or speak

can use the mantras. Mantras never confront any religion, and will lead to automatic effect irrespective of human beliefs, since this knowledge is recognizable by science where laws of light and sound have already been discovered. I have spent many years with my Teacher who taught me all the methods as how to choose individual mantra for each person based on their horoscope.

2. FAST- fasting is the method of cleansing the body-mind and is very beneficial for health as well as strength of the mind.

Many spiritual teachings recommend fasting as the method of cleansing the mind and the soul. Our tradition normally recommends fasting to alleviate certain problems.

3. PHYSICAL AND MENTAL PROTECTION

This method of remedies converts knowledge of minerals in nature which can influence mostly our body in the similar way as the thunderdome can prevent from thunders and lightning. I have been well trained to give you advice about the correct choice of certain mineral or precious stone which can best influence your health, body and environment. My sampradaya (tradition) opines that minerals, gemstones and metals are very beneficial for health matters, and bodily comforts, while mantras are very powerful for mind and the soul, even though our experience shows that health problems were drastically removed or alleviated by the regular mantra practice, as well as luck, marriage and other visible areas in life.

We use two major methods in selecting the kavacha (shield, armour) for the person:

1. Method is gemstone or mineral which is to be worn around the neck, or on particular finger. If we use it on the finger we can specifically target the desired effect. I have spent many years in India, and have never been able to find the correct gemstones over there, where they will mostly sell cheap or false stones, or even if we were able to get a good quality, it was a „heated“ stone, which is not recommended for jyotish use. Therefore, I personally buy stones from the company Jasna Gemstones from USA, where you will surely get the top quality and cheap stone, and get appraisal for it. After I recommend the stone please visit the following link to inquire about the stone www.planetarygems.com
2. Rudraksha beads are fruits of the holy tree present in Nepal and Indonesia. Shiva Purana (holy scripture) advise the use of Nepali Rudraksha, which we use and recommend. Rudrakshas are holy beads, which we wear to enhance the spiritual, mental and physical power and protect ourselves from negative influences in our lives. I could write a volume on Rudrakshas, and perhaps, to put it shortly, we believe that it is the most powerful remedial measure to use. Today it is very difficult to get the high quality rudraksha, so if you are interested please let me know and be patient. I have searched for reliable and genuine source for more than 7 years in India.

Knowledge of the Rudrakshas is given in Shiv Purana, which I have been initiated through my Guru. All religions state that when men cry they are very close to God,

and that during these very moments, God can hear and understand our suffering. Shiva Purana states that Rudrakshas are tears of Shiva (Shiva is Holy Father), who sees the soul suffering and cries with us. The wearing of Rudraksa is one of the greatest protection one can have. I have been fully trained to select appropriate Rudraksa for you, and give you the correct instruction as how to wear it and maintain it. This can go as a part of standard jyotish reading, as per your request.

Therefore, thank you for your attention and patience.
